# Ancestor Worship and Korean Society

Roger Janelli

The research of ancestor worship has an eminent pedigree in disciplines: social anthropology and folklore (Goody 1962: 14-25; Newell 1976; Fortes 1976; Takeda 1976). regardless of seen ameliorations in geographical specialization and highbrow orientation, researchers in either fields have shared a standard method of this subject: either have attempted to narrate the ancestor cult of a given society to its family members and kin-group organization. this kind of approach is to be anticipated of social anthropologists, given the character in their discipline; yet even the Japanese folklorist Yanagita Kunio, whose method of folks tradition stems from historic and nationalist concerns, all started his paintings on ancestors with a dialogue of Japan's descent process and relations constitution (Yanagita 1946). Indeed, connections among ancestor cults and social relatives are obvious. As we pursue this line of analysis, we will see that rural Koreans themselves are really refined approximately such matters. Many experiences of ancestor cults hire a mix of social and mental ways to give an explanation for the character qualities attributed to the useless via their residing kin. specific consciousness has lengthily been given to explaining the antagonistic or punitive personality of the deceased in lots of societies (Freud 1950; Opler 1936; Gough 1958; Fortes 1965). purely recently, however, has the recognition of such ideals been well-known in China, Korea, and Japan (Ahern 1973; A. Wolf 1974b; Kendall 1977; 1979; Yoshida 1967; Kerner 1976; Lebra 1976). The earliest and so much influential reports of ancestor cults in East Asia, produced by way of local students (Hozumi 1913; Yanagita 1946; Hsu 1948), overemphasize the benign and protecting characteristics of ancestors. a few neighborhood adaptations notwithstanding, this past bias seems to mirror a basic East Asian reluctance to recognize cases of ancestral affliction. Such reticence isn't present in all societies with ancestor cults, however; nor, in Korea, China, and Japan, is it both commonplace between males and women. Therefore, we search not just to spot the social studies that provide upward push to ideals in ancestral hostility, yet to give an explanation for the concomitant reluctance to recognize those ideals and its Ancestor Worship and Korean Society various depth all through East Asia. In view of the restricted quantity of ethnographic information to be had from Korea, we've not tried a accomplished overview of the ancestor cult in Korean society; as an alternative we've saved our specialize in a unmarried family group. we now have drawn on information from different communities, however, with a purpose to separate what's it seems that real of Korea in Ancestor Worship and Korean Society most Ancestor Worship and Korean Society cases from what might be odd to groups like Twisongdwi, a village of approximately 300 people that was once the positioning of our fieldwork. during this task, we benefited considerably from 3 first-class experiences of Korean ancestor worship and lineage association (Lee Kwang-Kyu 1977a; Choi Jai-seuk 1966a; Kim Taik-Kyoo 1964) and from fresh money owed of Korean people faith and beliefs (Dix 1977; Kendall 1979). but we're nonetheless some distance from a entire figuring out of the way Korean ideals and practices have replaced over time, correlate with assorted degrees of sophistication status, or are plagued by neighborhood diversifications in Korean tradition and social organization. Because we wish to supply a monograph available to a slightly various readership, we stay away from utilizing Korean phrases and disciplinary terminology at any time when possible. the place a Korean time period is very important, we supply it in parentheses instantly after its English
