The Pillar of the Sky by Cecelia Holland

Cecelia Holland

From deep within the mists of time, Cecelia Holland has drawn forth this story of lifestyles at the Salisbury Plain, one of the Stone Age Britons who equipped The Pillar of the Sky Stonehenge. It's the tale of hunters, of kings and matriarchs, and of 1 outcast boy who turns into a shaman, burning with an imaginative and prescient that would take form in robust pillars of stone.

One of my all-time favorites, I discovered this ebook within the CBU library years in the past in high school and took it home since it sounded interesting. I totally couldn't position this ebook down. In the course of college I received detentions for examining in school and never being on task. I learn it in the course of dinner and lunch and breakfast. I received restricted sleep simply because I stayed up examining into the early hours of the morning. The best way that the authors follow Moloquin from youth to maturity left me chuffed and his depiction of the tribe all through those years dragged me into the book. I swear that for every week in the course of my sophomore 12 months in high school I used to be in B.C. England gazing Stonehenge built and a tender outcast's desires come alive.
