Now look... i am an incredible Beatle fan. approximately as monstrous as they arrive with out being an entire freak show. Went on a pilgrimage to Abbey Road. be aware of the place the precise edits are in Strawberry Fields. the complete 9 yards. However, I simply have a difficult time getting with Beatle songs taught at college level, deconstructing every one tune, analysing each key change, etc... Lennon/Mcartney have been legendarily nice songwriters--made even greater in my eyes, much more amazing, in that they very likely could have essentially no suggestion what any of the stuff during this publication means. They wrote chord alterations and melody strains reason they notion they sounded good, or simply because they'd simply realized a brand new chord the day ahead of and acknowledged 'wow, let's placed that cool new chord in our new song!'... now not simply because they have been basing cadences on voice leading, or they have been going after an aleatory vibe, or whatever like that. That being said, evidently Stevens is a wealth of information and a professional in his field, so The Songs of John Lennon: The Beatles Years if this sort of factor does it for ya, than opt for it, you'll do much worse.
